Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Detail-oriented and analytical Artificial Intelligence and Machine Learning (AIML) student with a strong foundation in core programming paradigms, software development, and mathematical computing. Proven leadership and project management capabilities demonstrated through executing large-scale campus events and technical initiatives. Eager to leverage technical skills in machine learning algorithms, data structures, and statistical analysis to solve complex real-world problems.

EDUCATION

Sapthagiri NPS University

Bengaluru, India

Bachelor of Technology (B.Tech) in Artificial Intelligence and Machine Learning

- Relevant Coursework:** Object-Oriented Programming (C/C++), Data Structures and Algorithms, Differential Calculus, Linear Algebra, Foundations of Artificial Intelligence, Database Management Systems.
- Key Achievements:** Actively involved in departmental event organization, academic project presentations, and student technical committees.

TECHNICAL SKILLS

Programming Languages: C, C++, Python (Data Science and ML libraries)

Mathematical Foundations: Differential Calculus, Linear Algebra, Core Statistical Analysis

Software & Tools: Git, GitHub, VS Code, Linux Systems, Application Development Environments

Core Competencies: Data Structures, Array Manipulation, Pointer Management, Algorithm Design

PROJECTS & LEADERSHIP EXPERIENCE

Sapthagiri Premier League (Season 2)

Jan 2026 – Apr 2026

Lead Organizer & Operations Coordinator

- Led the end-to-end planning, resource budgeting, and execution of a massive multi-day sports tournament involving cross-functional campus teams and external vendors.
- Spearheaded digital marketing campaigns, match scheduling workflows, and promotional strategies, including organizing a live automated player auction event.
- Managed stakeholder communication between university management, corporate sponsors, and student bodies to guarantee seamless logistics and operational excellence.

Academic Technical Projects

Dec 2025 – Present

Data Structures & System Implementation

- Developed structural programs in C/C++ implementing complex multi-dimensional arrays, dynamic memory allocation models, and advanced pointer management workflows.
- Engineered efficient control structures to optimize data processing algorithms, improving execution time, memory footprints, and overall code modularity.

- Managed complete source code versioning, branch strategies, and collaborative developer workflows utilizing Git and GitHub repository structures.

CERTIFICATIONS & EXTRA-CURRICULARS

- **Technical Member**, Department of Computer Science & Engineering technical club.
- **Event Management Lead**, Physical Education & Sports Committee.
- Continuous learner specializing in modern automated workflows, scripting, and data-driven optimization.
