

BRUNDA LAKSHMANA

DevOps Engineer

Bangalore, India | +91-8618083557 | brunda8618@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of hands-on experience in Cloud and DevOps ecosystems, currently at MS Technology. Specialized in Microsoft Azure, CI/CD automation using GitHub Actions, containerization with Docker and AKS, Infrastructure as Code, and Azure PaaS services. Experienced in AI-assisted development using GitHub Copilot in VS Code for troubleshooting, pipeline scripting, and automation. Strong focus on automation, security best practices, GitOps, and monitoring.

WORK EXPERIENCE

DevOps Engineer – MS Technology, India (Subsidiary of MSET, Dubai) *March 2023 – Present*

Client: Procter & Gamble (PG) | Application: PampersClub

Azure Cloud & PaaS Services

- Provisioned, managed, and troubleshoot Azure PaaS services including Web Apps for Containers, Function Apps, Service Bus, Redis Cache, Storage Accounts, Cosmos DB, and MongoDB for the PampersClub application.
- Managed container images using Azure Container Registry (ACR) for AKS and App Services.
- Configured secure storage with encryption, access control, and Key Vault integration.
- Managed SSL certificates lifecycle using Azure Key Vault.
- Worked with Azure Networking concepts including VNet integration and private endpoints.
- Implemented Azure API Management (APIM) for secure and scalable API delivery.

CI/CD & DevOps Automation

- Designed and maintained end-to-end CI/CD pipelines using GitHub Actions for the PampersClub platform.
- Migrated CI/CD pipelines from Azure DevOps to GitHub Actions, improving pipeline efficiency and developer experience.
- Integrated SonarQube and Snyk for automated code quality and security scanning within pipelines.
- Implemented GitHub Advanced Security (GHAS) features including Code Scanning, Secret Scanning, and Dependabot alerts to enforce security policies across repositories.
- Managed Azure DevOps repositories, pipelines, artifacts, and access control.
- Implemented branching strategies, PR validations, and CI/CD policies to enforce quality gates.
- Developed automation scripts for deployments, health checks, and system integrations.

Containers, Kubernetes & GitOps

- Managed containerized workloads using Docker and deployed PampersClub application on Azure Kubernetes Service (AKS).
- Worked on AKS clusters for microservice deployments and troubleshooting in multi-region environments.
- Used Lens for cluster visibility, monitoring, and validation.
- Implemented GitOps-based multi-region deployments using Flux CD and Helm charts.
- Deployed and managed Kubernetes resources including Pods, Services, Deployments, ConfigMaps, and Ingress.
- Integrated Azure Key Vault with AKS using CSI Secret Store driver for secure secret management.

Security & Compliance

- Implemented Managed Identity authentication for Azure Service Bus, eliminating hardcoded secrets from pipelines.
- Configured Azure Key Vault for centralized management of secrets, certificates, and connection strings.
- Applied Azure security best practices and Azure Policy for compliance enforcement.

Monitoring & Incident Management

- Built Azure Logic App workflows to send automated real-time alerts to Microsoft Teams channels.

- Configured Application Insights and Azure Monitor for end-to-end performance monitoring and diagnostics of the PampersClub application.
- Set up dashboards and alert rules for proactive incident detection and response.

AI-Assisted Development & GitHub Copilot

- Utilized GitHub Copilot Chat in VS Code to troubleshoot infrastructure and deployment errors, leveraging AI-suggested root cause analysis and fixes to reduce debugging time.
- Leveraged GitHub Copilot to write and optimize GitHub Actions pipeline scripts and Azure automation scripts, improving scripting speed and reducing manual effort.
- Created custom Copilot instructions in VS Code tailored to the team's DevOps stack (Azure, AKS, Docker), improving code generation accuracy for repetitive infrastructure tasks.

TECHNICAL SKILLS

Cloud Platform: Microsoft Azure (PaaS & IaaS)

AI & Automation: GitHub Copilot, Copilot Chat, Custom Copilot Instructions, AI-Assisted Scripting

CI/CD & DevOps: GitHub Actions, Azure DevOps, Pipeline Automation

Containers & Kubernetes: Docker, AKS, Helm, Flux CD, Lens

Monitoring: Azure Monitor, Application Insights, Azure Logic Apps

Security: Azure Key Vault, Managed Identity, Snyk, SonarQube, GitHub Advanced Security (GHAS)

Azure Services: Service Bus, Cosmos DB, Redis Cache, APIM, ACR, Function Apps

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
